

## We're Ready! Post-Workshop survey

The purpose of the pre- and post-workshop survey are to determine whether the purpose, goals and deliverables of the We're Ready! Pilot Project were met and to gather feedback for improving it. Additional information is also gathered to gain a better understanding about participant's risk awareness, experience with major emergency or disaster, emergency preparedness behaviours, social connections, and your confidence in knowing what to do in an emergency. The survey questions are either the same, or similar to, as those asked in Statistics Canada's 2014 Survey of Emergency Preparedness and Resilience (SEPR).

For the purpose of this survey, community can refer to either social community or geographical community. Social community (e.g., friends, family, a group) can be people living in different parts of Edmonton and area but having a common interest or purpose. Geographical community can be your workplace colleagues or the neighbourhood in which your home is located (usually 3-5 block radius). For the sections or questions in this survey, we clarify which type of community we are asking about.

Your participation in the We're Ready! pre-workshop and post-workshop surveys is voluntary. In order to ensure your anonymity, no identifying information is collected such as name or address and responses will be aggregated. No information that could identify you or your workplace or household will be released. The aggregated information collected in these surveys may be shared with the University of Alberta, as well as municipal, provincial, and/or federal offices and organizations in order to improve emergency services and programs. The findings may be published in reports and/or other publications.

**By completing this survey you are consenting to the use of the results for the purposes specified above.**

If you are not sure about how to answer a question or the wording of a question, call one of us over. If you have comments about a particular question you would like us to read, you can also write it down next to that question.
